

To THE FCC,I believe as a subscriber to XM Radio I have the right to be provided the services made available to us consumers...we pay for this monthly services. Sometimes I need the Instant Traffic & Weather right on the spot before I head to work, this is a service provided by XM Satellite radio and that is why i'm willing to pay for they're services as well as the many different types of music genre they offer. Let's leave XM RADIO alone on this issue.
